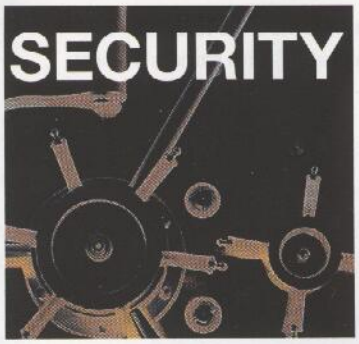
FEATURES

SECURITY INSIDE



Cover: Getty Images/Design Staff

Companies face severe database security issues. They need to allow a broader range of access, but still protect vital information from external and, increasingly, internal threats. Find out how Oracle can help your organization protect its mission-critical data and improve accountability and efficiency.

—David A. Kelly /40

CONTENT AT YOUR FINGERTIPS

Most business data is unstructured content, and handling it effectively is a big concern for firms that need to manage millions of documents, images, spreadsheets, and e-mails. See how Oracle content management solutions improve productivity and compliance.

—David Baum /58

REFINING THE WHEEL

Inaccurate records and data discrepancies do more than create organizational and customer frustration. They can hurt productivity and ultimately the bottom line. Now data hubs are giving companies a single point of truth when they need critical information.

—Alan Joch /48

ORACLE MAGAZINE AT TWENTY

As *Oracle Magazine* celebrates its 20th anniversary, Publisher Jeff Spicer looks back at the technologies and people that shaped the magazine.
