COVER STORY

42 RFP: The 90-Day Data Mart

By David Baum. When Pacific Home Products needed to establish stronger information systems to support corporate growth, business in new markets, and quick response to customer needs, it developed an RFP and turned to Oracle Consulting to set up a data mart as an initial step in creating an integrated data-warehouse architecture. The company is fictional, but the details are not.

44 RFP: Defining the Picture

Laying out the pieces that bidders will put together in a data-warehouse project proposal.

46 Piece by Piece: Phases and Deliverables

Oracle Consulting's two-phase approach to developing a Web-based multidimensional data mart.

48 Role Playing: Piecework

Defining the roles and responsibilities for the implementation team from Pacific Home Products and Oracle Consulting.

50 Data-Mart Essentials

Three key elements for successful data-mart projects: platform, integrated tools, and consulting.

52 Making Up Pacific Home Products

Knowing the company's vital statistics and project goals are key points in the decision-making and system-design processes.

54 Expert View

Industry analyst Mitch Kramer points out the key considerations for data-warehouse projects and provides a look into the future of the data-warehouse market.

56 Good References

Check a consulting firm's references to make sure it has real-world knowledge about projects similar to the one on which it's bidding for your company.

56 Data-Mart Dynamics

Starting with a focused problem statement helps ensure clear direction in data-mart construction projects.

58 Help from the Pros

How Oracle Consulting turned the experience gained in previous projects into structured frameworks for implementing data marts and data warehouses.

62 Into the Future: Web Warehousing

The World Wide Web has provided companies with new ways to provide more users with access to vital decision-support information.

ORACLE TOOLS/ORACLE APPLICATIONS/
ORACLE DATABASE SERVER

64 Tools for Success

By Joe Mullich. An inside look at how real-world companies are using Oracle development tools to move their businesses onto the Web and into the future. Despite the differences in their industries, Rockford Corporation, U.S. Satellite Broadcasting, Guyana Sugar Corporation, and Millipore are taking similar approaches to move their businesses forward.

FROM THE EDITOR

9 Sudden Cool

By Leslie Steere. IT moves from back to center stage and into the spotlight.

INDUSTRY INSIGHTS

11 The Information Supply Chain

By Aaron Zornes. Winning companies in the next century will be those customer-centric competitors that extend and incorporate new types of information and establish new channels.

128 Truly Open Toolkit

By Anne Thomas. Open systems are more important now than ever before. In addition to supporting vastly larger client loads, Internet application systems will need to interoperate with numerous heterogeneous systems.

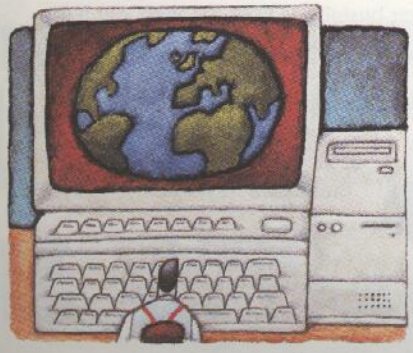
NEWS

15 Product News

JDeveloper Suite, Java Virtual Machine for Oracle8, Oracle Web Developer Suite, Designer/2000 Release 2.1, EMC storage systems for Oracle Parallel Server, Oracle Express Server for IBM, Bug Database online, QuickScope method for data marts, usability testing in software development, Oracle OpenWorld 1998.

27 Value Added

Third-party tools for customer-interaction management, software development, application tuning, software testing, and more.



PROBLEM SOLVED

79 Supporting Large Databases on the Web

By Bradley D. Brown. How to give your company a competitive edge by providing customers with information access over the Web.

ORACLE8

89 Security Management for Oracle8

By Diby Malakar. Making your data-warehouse information accessible via the Web is important to your business success—but so is controlling that access. Here are some keys to good security.

WEB WORKSHOP

101 Case Study: Moving to the Web

By Edward J. Baker. Copelco Capital is reaping the rewards of a thin-client Web system based on Developer/2000, Designer/2000, Oracle Financials, and Microsoft Windows NT.

FAST TRACK

107 Building Message-Based Apps with Oracle8's Advanced Queuing

By Steve Bobrowski. Five steps for building message-based applications that support mission-critical business functions.

DATABASE ADMINISTRATION

115 Using the Fast Full-Index Scan

By Guy Harrison. A little-known enhancement available in Oracle Database Server can supercharge the performance of suitable queries.
